- 2D drawings
- 3D drawings

Abstract.....

What is your company name and area of expertise?

Our company is called Tiny Houses Revolution and we specialise in designing and constructing tiny houses for individuals who are interested in unique lifestyle in order to have more freedom and flexibility in their lives. Although tiny houses are a huge differences from the contemporary styles of living, with our Tiny House builds, it is still possible to maintain the level of luxury and comfort you have in a traditional house with the added benefit of mobility!

Our team of competent designers, architects and building experts are dedicated to providing customer satisfaction by ensuring that your custom build is constructed to the highest quality standards.

We offer 3 sizing options for tiny house builds - 200, 275 and 350 square feet. An upgraded furniture package is also available for ease and "move-in-ready" convenience. The obvious benefit if this package is knowing that you will receive furniture that is fitted and suitable for your specific tiny house build.

What sets your business apart from your competition; why is your business special?

Our business is set apart from others because many home design companies only offer the more traditional housing designs. We, on the other hand, will create a digital, computer floor plan of your house design as a result of the minimal space within tiny homes, all furniture will of course be multipurpose.

Abstract.....

The idea behind the Tiny Houses Project:

The Tiny Houses Project is a multi-channel housing project that is aimed at enriching traveling experiences, make housing more accessible and affordable and will revolutionise real estate market ownership.

Where will the business be located?

The Tiny Houses Revolution Head Office will be located at:

1 York Road, Hounslow Central
Hounslow, TW3 1LA
England, United Kingdom

The location for the Tiny Houses Revolution Farm will be located approximately 30 miles from London, in the vicinity of South of England.

The Tiny Houses Revolution Retreat Centre will be located in London for the purposes of public rentals and vacation stays. However, the Retreat Centre are planned to be an international project with locations spanning globally in South Africa, Brazil and St Lucia.

Conclusion

Introduction.....

Tiny Houses Resolution

The tiny house revolution is a new movement that is gaining popularity all over the world. Quite a lot of people are downsizing, quite literally, yet the desire to live simply is growing every day.

The minimalist lifestyle has advantages as well as drawbacks. If you want to save money on your housing costs and be more environmentally friendly, consider tiny house living.

With a little planning and knowledge, you can make the switch to a much smaller space while saving thousands of dollars per year and reducing your carbon footprint significantly. In fact, some tiny house owners have even been able to completely eliminate their housing costs completely.

Introduction.....

What are tiny houses?

There is no official definition of what constitutes a Tiny House, but to make things simple we can say that the Tiny House Movement promotes simple living in a small house that ranges from 80 to 400 square feet.

There are many benefits of Tiny Houses, but the ones that speak to us the most are sustainability, accessibility and freedom:

SUSTAINABILITY

Tiny Houses have less impact on the environment. By living smaller, we consume less commercial goods, energy and space. The movement also inspires innovative solutions for more sustainable living. One of our stretch goals in our Kickstarter campaign for Tiny Houses Retreat, is developing and equipping our Tiny Houses with solar panels and smart house solutions. We are looking into the future!

ACCESSIBILITY

A Tiny House is considerably cheaper than a traditional house. By choosing to cut down the space and live minimally you choose financial freedom that you don't need to wait (or take a life-long loan) for. In the future, we want to build and let Tiny Houses and spaces as forever homes, allowing people of all life circumstances to own a home.

FREEDOM

Living in a Tiny House is stepping back from a paved path. The simplicity of such life allows you to have a life of purpose. Free of considerable responsibilities related to traditional house ownership. All our Tiny Houses are completely self contained and on wheels. As a Tiny House owner you can choose when and where to stay or just take off. It's the perfect solution for an adventurous break!

Introduction.....

Our Story

We are enthusiasts of Tiny Houses and sustainable living and strongly believe that we will be able connect NFT's and Tiny Houses into a modern way of everyday travel & living.

The project founder and CEO of Tiny Houses Revolution, Pawel Raczkowski, is based in the UK and has years of experience in digital marketing, project design and property management. He has already designed and built a prototype of an original Tiny House which is unique as it is on wheels and features a flexible interior layout and space-saving furniture.

The idea behind the Tiny Houses Revolution project is to mint Tiny Houses Revolution exclusive NFT's which will serve as digital keys for holders to gain access to the Tiny Houses Revolution community and events. We are planning to build a farm and Tiny Houses workshop which will facilitate our NFT community and to bring like-minded people together to unite them around what they love.

The NFT owners can enjoy the benefit of different utilities of the Tiny Houses including discounted stays, royalties and access to future events.

We have the road map of each stage of the project to keep the project realistic and achievable. Tiny Houses Revolution plans to capitalise on the building of tiny houses in conjunction with the 4 company pillars to increase the intersection between tiny houses and NFT's. This will be the cornerstones of engagement and lifestyle within Web3.

We will continuously adapt, innovate and seek the advice of the community to introduce these next-generation products to the masses.

Introduction.....

NFT Inclusions

Our NFT will include Tiny Houses designed to combine practical living and stylish comfort. The modern tiny house will be manufactured with a trailer to allow maximum mobility so that you may take your Tiny House with you, wherever you may go.

Our NFT includes a wide range of perks and utilities, such as free stays at the Retreat Centre's, entry into the THR Lottery to win a physical build, and rental discounts. THR NFT holders will own the rights to the 3D design of their chosen NFT, and will also receive royalties.

Moreover we'll share with you a description of this FUTURISTIC tiny house:

This luxurious Tiny House designed to combine practical living and stylish comfort, measuring approximately 2.5 meters by 4 meters and 7 meters high. It has a white wooden kitchen with a beautiful view of the outside, with a comfortable dark blue shaded sofa on the side and a dreamy loft that can fit a king bed and home cinema with large screen TV.

As a futuristic Tiny House, it is equipped with solar panels that takes the shape of an angled roof, artificial intelligence set up inside the house, a lithium powerwall home battery, a rainwater harvesting system and a lot more! Living in these accommodations means lower bills, a smaller carbon footprint, and a friendly house to nature.

"Modern tiny house with a trailer that you can drag it with you wherever you want , self sufficient and a friend to nature, claddded with black wood as an exterior facade which makes it harmonious with the environment and gives it a modern look at the same time."

Introduction.....

Benefits of tiny house?

There are many benefits to living in a tiny house. First, they are much cheaper to build and maintain than a traditional home. Second, they use far less energy and resources, making them more environmentally friendly.

For example, it takes six gallons of water per day for one person to shower in a typical American household. In contrast, you could shower every day for four years before running out of water if you lived in a tiny house with two other people!

Third, they are compact enough that you can move them from place to place relatively easily. Fourth, some models have been shown to increase self-sufficiency among their inhabitants by providing heat from solar panels or wind turbines and through vegetable gardens which provide food for the occupants without needing expensive fertilizers or pesticides.

Where can you park your tiny house?

You can park your tiny home almost anywhere! Whether you're in the city or the country, there are plenty of places you can park your tiny home. In the city, you can park your tiny home in a friend's driveway, on a vacant lot, or even in a parking garage. In the country, you can park your tiny home on a piece of land that you own or rent. You can also park your tiny home in an RV park or campground. As long as it is legal for them to exist, you'll be able to find someplace nearby where you can set up your tiny house.

NFT Collections.....

1. Artemis Collection

The THR Artemis Collection has a natural look wooden pannelled exterior with the interior following suit. The facilities for the Artemis Collection include a loft bedroom, a modern and fully fitted kitchen area with an adjacent sitting area. The kitchen has two large double doors that can be used as a patio entrance, increasing the natural light flow within the house. The bathroom is fully functional and contains everything needed for daily use.

The name of our Artemis Collection is derived from the Roman god of the same name who is the goddess of the moon, the hunt and young maidens.

2. Iris Collection

The THR Iris Collection is a smaller, modern design with a two-toned exterior. The interior of the Iris is sleek with modern finishes throughout. The facilities are comprised of a fully fitted kitchen, a ground level bedroom, a sitting area with an abundance of natural lighting and a fully equipped bathroom.

The name of our Iris Collection is derived from the Roman god of the same name who is the goddess of the rainbow and messenger of the gods.

NFT Collections.....

3. Apollo Collection

The THR Apollo Collection has a brick design for the exterior, giving it a more sophisticated look. The interior is comprised of two large, ground floor beds designed as a more modernised bunk bed with the top bed being easily accessed by stairs. The kitchen is fully fitted with space for a front loading washing machine, an overhead microwave, sleek look stove and a breakfast nook. The bathroom has an overhead shower, basin and toilet with modern finishes throughout the house.

The name of our Apollo Collection is derived from the Roman god of the same name who is the god of archery, music, poetry, medicine and later, the god of the Sun.

4. Square House Collection

The THR Square House Collection features four tiny houses that are interlocked to create a safe haven for any large family or community that wants to maintain independence but also wants to create a shared space! These connected tiny houses will have a beautiful garden in the center to tie everything together. All houses are fully functional and equipped for everyday living, with modern designs and finishes throughout.

NFT Collections.....

5. Manufacturer Warehouse Collection

The THR Warehouse will be located in the Southern region of England (Devon, Southampton, Cornwall, etc) and will be used for the manufacturing of our Tiny House builds & for our engineers to work on the Tiny House innovations.

It will also double as a private getaway experience for our NFT holders and will include amenities such as approximately 10 Tiny Houses for accommodation purposes, jacuzzi's, fire pits, live entertainment & more!

6. Retreat Centre Collection

The concept of the Retreat Centre is an Octagon design to interconnected the tiny houses together as a retreat centre. It caters to the active lifestyle with opportunities to engage with different exercises, yoga, spa and outdoors. These components help connect family and friends with dedicated space to retreat to.

NFT Collections.....

7. Eco Luxurious House Collection

The THR Eco House is our most sustainable build that comprises of everything to minimize your carbon footprint, lower your energy consumption and maintain the most off-grid lifestyle imaginable.

With a rainwater harvesting system, eco toilet options and solar paneled roofing, this design allows you to enjoy the comforts of grid-living, without the guilt of overconsumption.

8. Luxury House Collection

The THR luxury house is what dreams are made of! With a larger interior and an modern, sophisticated exterior that supports a patio and a spacious balcony! The interior is packed with entertainment and comprised of an upstairs loft bedroom, equipped with a home cinema and entry way to the aforementioned balcony. The downstairs area has fully equipped kitchen with an overhead oven and table top stove. Adjacent to the kitchen is a sitting area and breakfast nook that has large windows allowing plenty of natural light flow. The bathroom is luxurious with an overhead shower that can double as a sauna!

NFT Collections.....

9. Mini Hotel House Collection

The THR mini hotel collection is designed for all the property enthusiasts that want to get their foot into the market! Our Mini Hotels are fully functional and equipped for short term stays and is comprised of 4 single bed pods, a fully furnished kitchen and a large enough bathroom to share.

10. Recording Studio Tiny House

Introducing the Tiny Houses Revolution Music Studio - A minimalistic, beautifully designed Tiny House for all of the musically inspired and virtuosos!

Included in this design is a retractable kitchen table for space saving, a dry sauna for relaxing to get those creative juices flowing and large sound proofed windowing for both natural light flow and smoother audio recordings!

Our company goal (4 Pillars of Tiny house).....

PILLAR 1: Luxury Retreat

With Tiny Houses Retreat, we aim to develop and extend the facility and construction of the Tiny Houses which will be available in the 2023 vacation season for the purpose of holiday rental. As a patron of the campaign, you will be able to hire a Tiny House for your holidays and have an opportunity to either settle and relax in one of the chosen locations, or take the Tiny House on an adventurous trip (Yes, the houses will be on wheels!).

The locations are yet to be confirmed, but to encourage and enrich the domestic travel experience in times of limited international movement, we will choose 2 to 3 locations in the beautiful British countryside.

PILLAR 2: Innovations

One of the main pillars for Tiny Houses are to make use of sustainable and renewable energy sources. We are planning to incorporate many innovations to the Tiny Houses designs in order to achieve this. These are some of the projects that we are working on including:

- Vertical wind turbines
- Solar panel roof tiles
- Lithium batteries
- Shower heads that utilise less water
- Water extractors and filters
- Space saving furniture
- Incineration toilets

Our company goal (4 Pillars of Tiny house).....

PILLAR 3: Social Help

The Tiny Houses Revolution project was initially inspired by the rising issue of housing accessibility and the ever-rising struggle for many, especially younger and lower-income individuals, to access homeownership.

Here at Tiny Houses Revolution, we are motivated help in alleviating the housing crisis we face in this country through social assistance. Through communication with local city councils, we intend to organize a campaign to provide a few Tiny Houses to those who are in desperate need of housing. We believe that everyone deserves to have a safe and decent place to call home.

PILLAR 4: Business Incubator

Here at Tiny Houses Revolution, our purpose is to create and support the community of people who are passionate about living and traveling in tiny houses. We also want to provide new opportunities to entrepreneurs, to start or expand their business, by leveraging 100% mobile and custom spaces. Our intention is to assist these individuals in generating their own income, now and in the future.

THR NFT's.....

NFT's and the future of tiny house

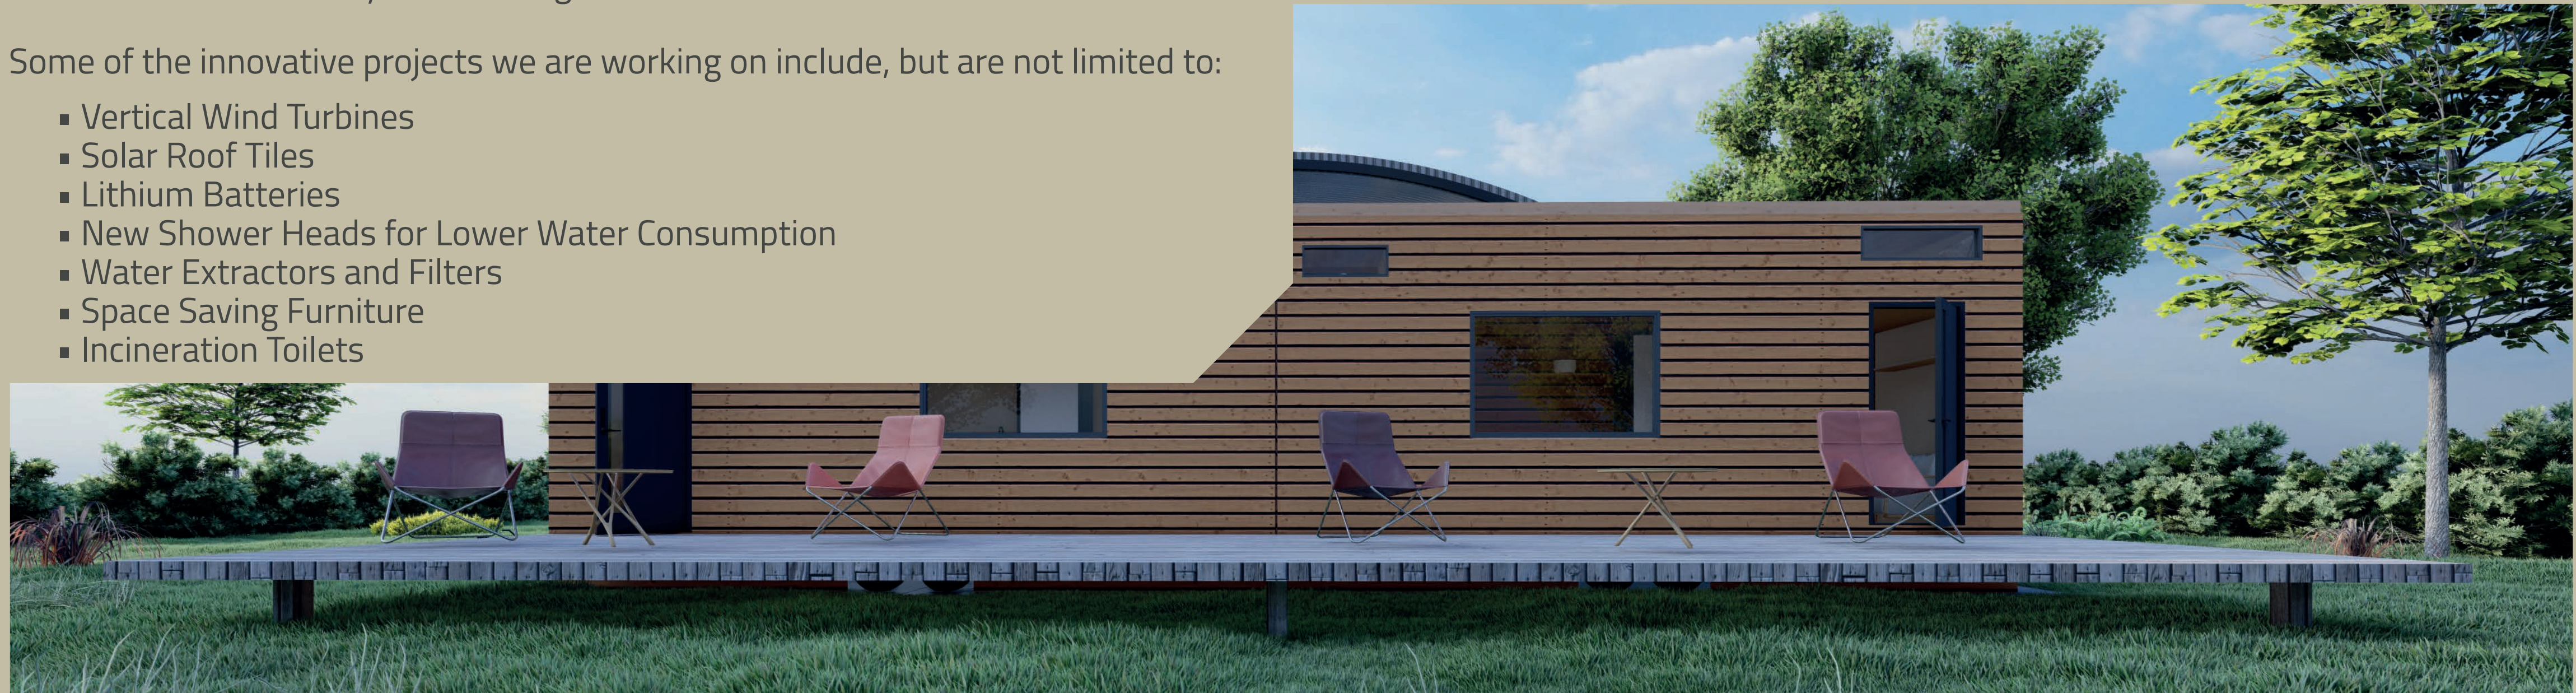

The usage of NFTs via Blockchain technology would be very beneficial for purchasing and selling tiny houses. Primarily because each transaction may be made without a large number of third-party businesses. With the proper infrastructure in place, NFTs and blockchain technology may be used to secure a transaction between a buyer and seller, transfer ownership, guarantee new ownership, execute escrow, and transfer funds used to acquire the tiny house.

Consider tiny house titles that link ownership to its NFT, which secures and proves ownership, permits proof of history indicating previous owners, age, certificates, etc., and opens up different of new options.

Here at Tiny Houses Revolution, our vision is to create Tiny Houses that run on natural, renewable and sustainable energy sources. We are planning to incorporate many innovations into our Tiny House designs in order to achieve this.

Some of the innovative projects we are working on include, but are not limited to:

- Vertical Wind Turbines
- Solar Roof Tiles
- Lithium Batteries
- New Shower Heads for Lower Water Consumption
- Water Extractors and Filters
- Space Saving Furniture
- Incineration Toilets

THR NFT's.....

Our NFT includes a wide range of perks and utilities, such as our free stays at the Retreat Centre's, entry into the THR Lottery to win a physical build, rental discounts. THR NFT holders will own the rights to the 3D design of their chosen NFT, and will also receive royalties.

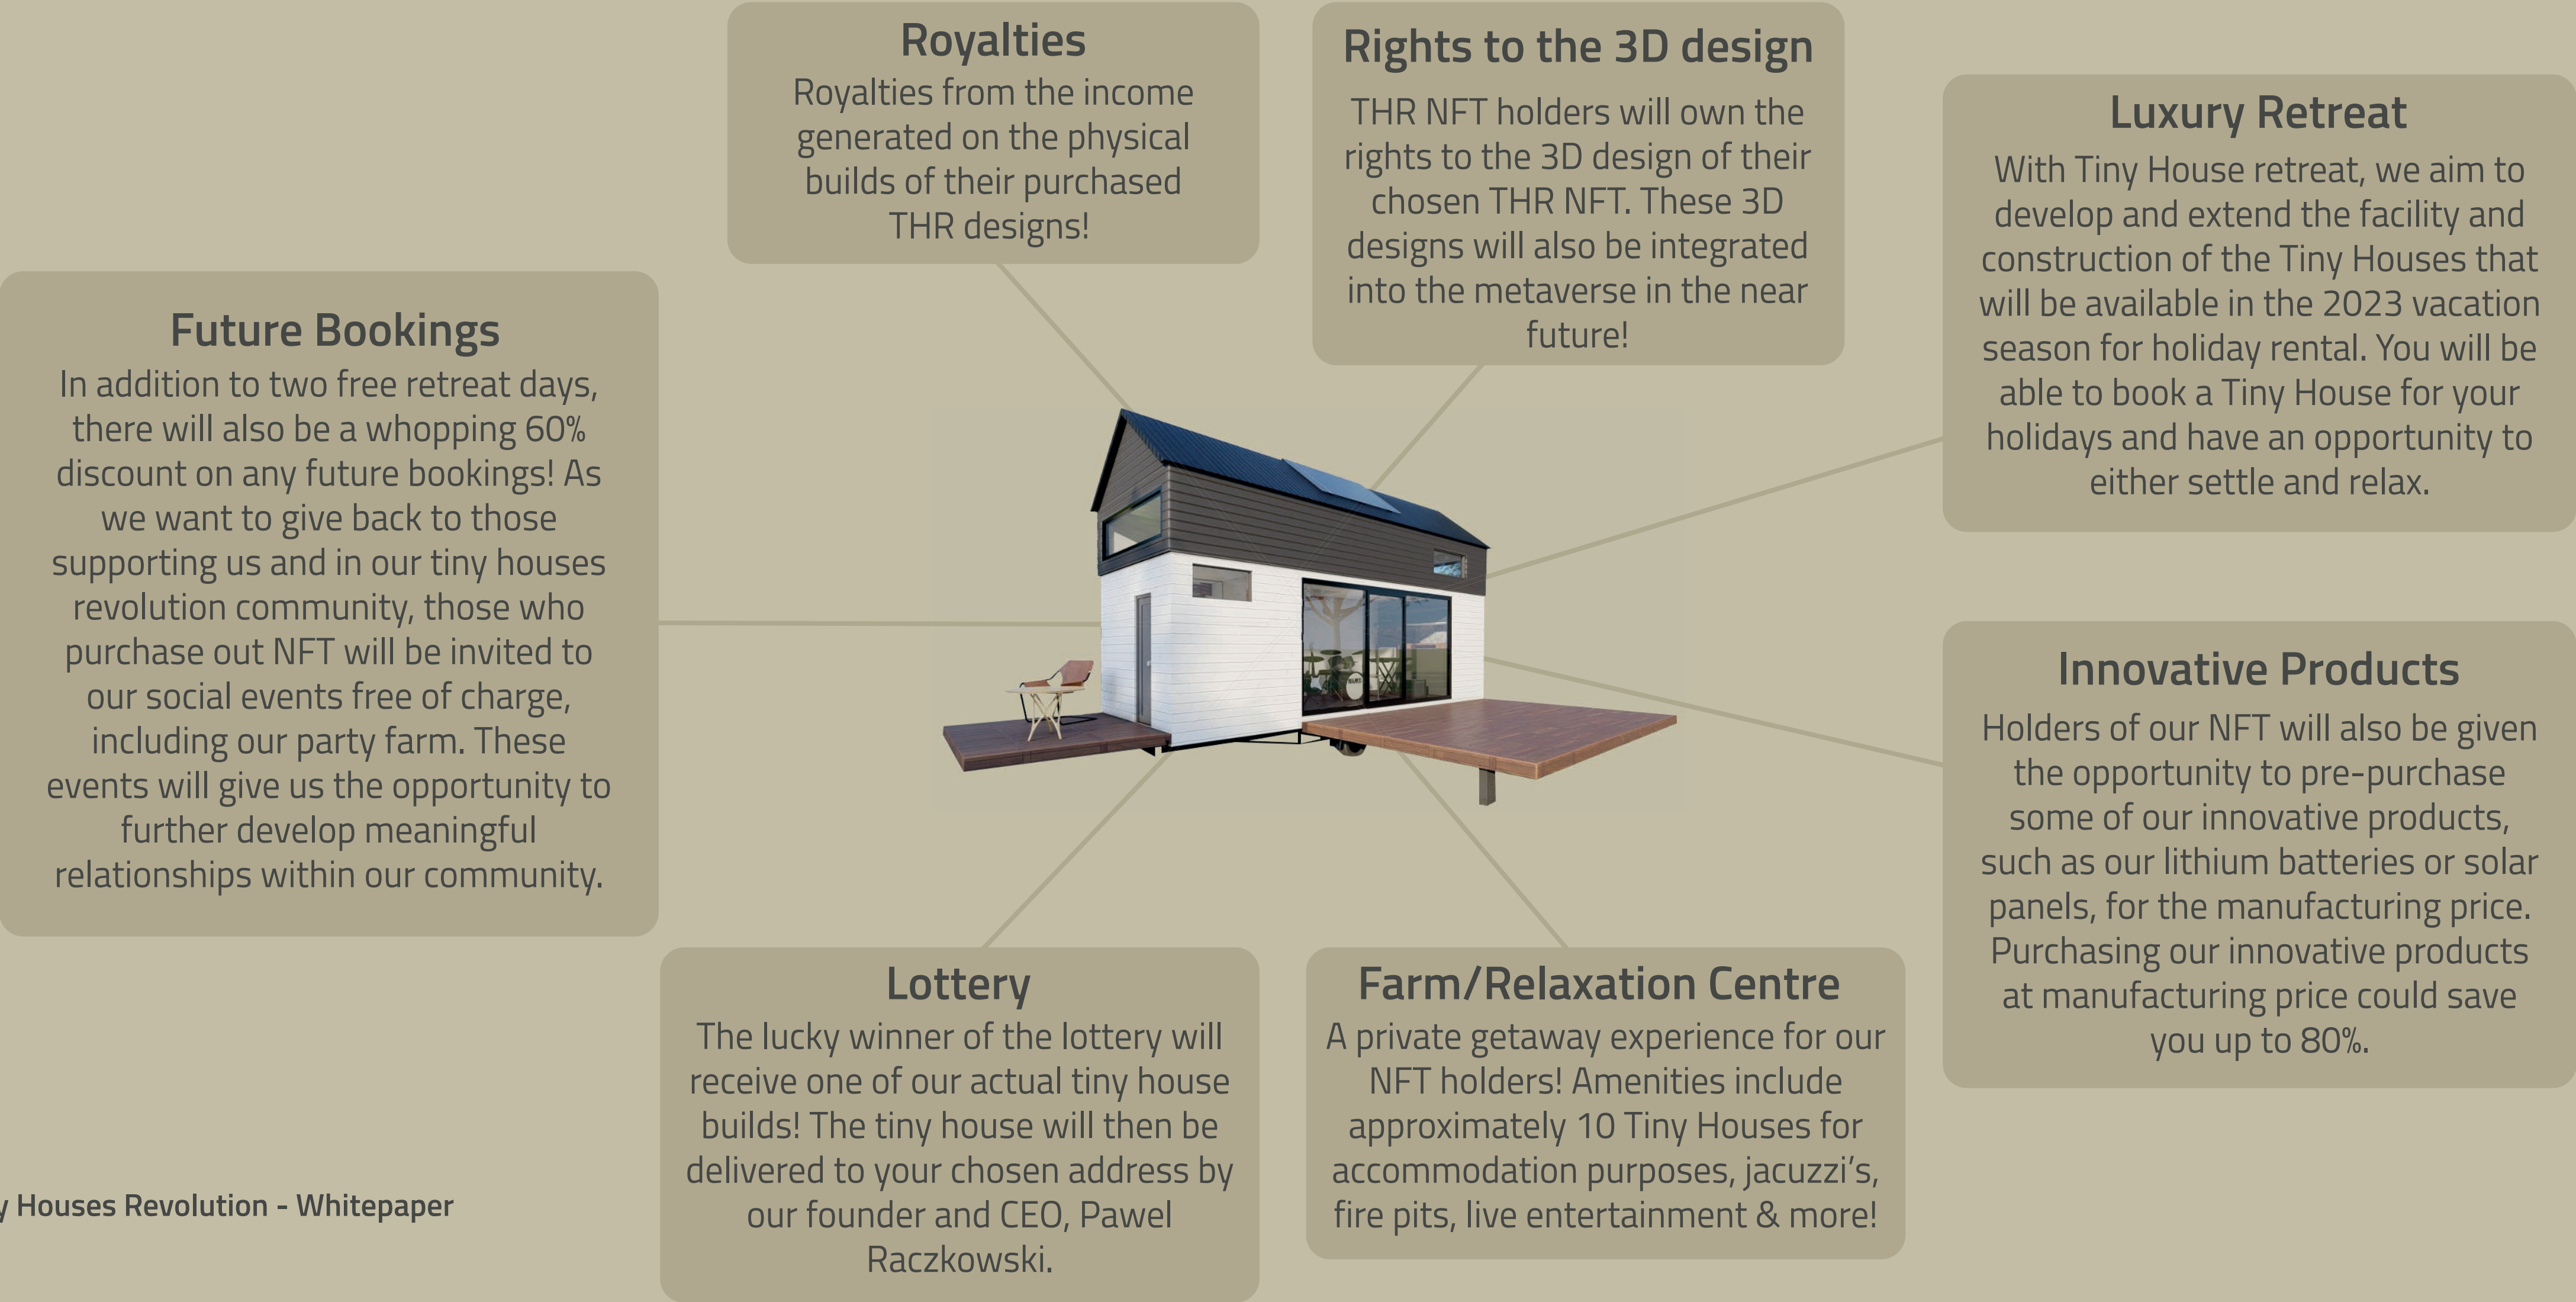

Our tiny houses retreat will give you the opportunity to relish the beauty of the UK nature side and disconnect from the urban noise. This is why those who purchase our NFTs will be able to stay at our tiny house luxury retreat for two days totally free of charge! Holders will be entitled to two free days annually.

In addition to two free retreat days there will also be a whopping 60% discount on any future bookings. As we want to give back to those supporting us and those within our Tiny Houses Revolution community, those who purchase our NFT will be invited to our social events free of charge, including our party farm. These events will give us the opportunity to further meaningful relationships within our community.

Holders of our NFT will also be given the opportunity to pre purchase some of our innovative products, such as our lithium batteries, for the manufacturing price. Purchasing our innovative products at manufacturing price could save you up to 80%. We will be holding a lottery that will see us give away a tiny house. This tiny house will be personally delivered to your chosen address by Tiny Houses Revolution CEO and founder Pawel Raczkowski.

Utility.....

Utility.....

Here at Tiny Houses Revolution we offer a variety of utilities to our NFT holders. Depending on your chosen THR NFT purchase, there are multiple utility options available to you!

Below are the different utility categories we have on offer and the sub categories of each NFT utility.

Dependant on your NFT choosing within the entire THR NFT Collection:

Utility.....

1. Retreat Centre

Our Retreat Centre’s enable you to hire a Tiny House for your holidays & have an opportunity to either settle and relax in one of the chosen locations, or take the Tiny House on a trip!

Retreat Centre NFT Utilities will be categorised as follows:

- 5% of the collection will have a total of 3-days unlocked at any Retreat Centre location
- 5% of the collection will have a total of 7-days unlocked at any Retreat Centre location
- 5% of the collection will have a total of 14-days unlocked at any Retreat Centre location
- 3% of the collection will have a total of 30-days unlocked at any Retreat Centre location
- 2% of the collection will have a total of 6-months unlocked at any Retreat Centre location
- 1% of the collection will have unlimited access to any Retreat Centre location

Utility.....

2. Future Retreat Bookings

NFT Holders are able to unlock a wide range of discounts for future THR Resort bookings

Future Retreat Booking Utilities will be categorised as follows:

- 5% of the collection will have a 10% discount at any Retreat Centre location
- 5% of the collection will have a 15% discount at any Retreat Centre location
- 5% of the collection will have a 20% discount at any Retreat Centre location
- 3% of the collection will have a 30% discount at any Retreat Centre location
- 2% of the collection will have a 40% discount at any Retreat Centre location
- 1% of the collection will have a 60% discount at any Retreat Centre location

Utility.....

3. Innovative Products

NFT Holders will have the opportunity to purchase some of our innovative items like lithium batteries and water filters for the manufacturing price, instead of retail!

Innovative Product Utilities will be categorised as follows:

- 5% of the collection will give you the option of purchasing our Water Saving innovations at manufacturing price
- 5% of the collection will give you the option of purchasing our Space Saving innovations at manufacturing price
- 5% of the collection will give you the option of purchasing our Power Saving innovations at manufacturing price
- 5% of the collection will give you the option of purchasing our Comfort & Entertainment innovations at manufacturing price

Utility.....

4. Farm/Relaxation Centre

A private getaway experience for our NFT holders! Amenities include approximately 10 Tiny Houses for accommodation purposes, jacuzzi's, fire pits, live entertainment & more!

Farm/Relaxation Centre Utilities will be categorised as follows:

- 10% of the collection will have free access to the Farm/Relaxation Centre
- 10% of the collection will have free access to all THR NFT hosted events

Utility.....

5. Lottery

The lucky winner of the lottery will receive one of our actual tiny house builds! The tiny house will then be delivered to your chosen address by our founder and CEO, Pawel Raczkowski.

Lottery:

- 5% of the collection will have a total of 1 entry into the THR Lottery
- 5% of the collection will have a total of 3 entries into the THR Lottery
- 5% of the collection will have a total of 5 entries into the THR Lottery
- 3% of the collection will have a total of 6 entries into the THR Lottery
- 2% of the collection will have a total 8 entries into the THR Lottery
- 1% of the collection will have a total of 10 entries into the THR Lottery

All NFT’s and the added utilities vary on price.

Terms & Conditions applies.

Utility.....

6. THR NFT Holders perks

THR NFT holders will own the rights to the 3D design of their chosen THR NFT. These 3D designs will also be integrated into the meta verse in the near future!

THR NFT holders will also receive royalties from the income generated on the physical builds of their purchased THR designs!

Utility.....

7. Farm for NFT holders

We have an exciting new project we are working on here at Tiny Houses Revolution!

In the coming months, we will be setting up a warehouse in the Southern region of England (Devon, Southampton, Cornwall, etc) for the manufacturing of our Tiny House builds and for our engineers to work on the Tiny House innovations.

However, in order to show our appreciation for those who purchase our Tiny Houses Revolution NFT's, this farm will double as a private getaway experience for our NFT holders!

After the initial release of our first collection of NFTs, we plan on building a beautiful barn on the farm that will be accompanied by an array of amenities to assist our NFT community in relaxation and entertainment, alike! Access to the farm is automatically obtained by providing proof of ownership of our NFTs and is completely free of charge!

The amenities included will include approximately 10 Tiny Houses for accommodation purposes, jacuzzi's, fire pits, live entertainment and so much more. This retreat will serve as a hub for us to become accustomed with our NFT community and for our community to become familiar with our company, on a more personal level!

EXPLORE

The World

WITH THR WEB 3.0 TRAVEL SITE

We are ommitted to providing top level experiences and travel packages and the absolute best rewards system in the industry.

THR Revolution Club.....

THR Web 3.0

THR WEB 3.0 puts you at the center of the travel experience, providing the travel website with **Crypto Rewards** that accrue through a blockchain-based tokenomics system.

What **THR WEB 3.0** adds to the experience is the ability to pay with any major cryptocurrency, as well as cryptocurrencies listed on the top Decentralized or Centralized Exchanges.

THR Revolution Club.....

Travel 3.0

Welcome to the **Travel 3.0 Experience**, Beta version which will be launched in the **Spring of 2023**. You'll get the best prices, the easiest payment options, and loyalty rewards that are measured in cryptocurrency. Watch your THR tokens accumulate over time through DeFi capabilities and Hold THR to enjoy upgrades and premium membership. Gain amazing reward bonuses when you redeem your rewards for travel and experiences.

THR Travel is committed to providing top level experiences and travel packages and the absolute best rewards system in the industry.

Our roadmap is ambitious and focuses on both investors and users.
Our primary objectives are expanding the **THR Coin** ecosystem to as many businesses as possible, and increasing the market value of the THR Token.

THR Revolution Club.....

THR Token

The THR Token is the reward token of the Tiny House Revolution Club platform.
THR allows you to:

Gain Gain tokens every time you make a purchase in any cryptocurrency on the Tiny House Revolution Club website. Using the THR wallet you spend any currency and receive rewards from 4% to 20% value of the transaction in THR Token form. 3% burned: A reduction in the number of tokens in the economy maintains a deflationary economy.

Earn Holding and staking tokens and liquidity pools allow THR Token holders to accumulate yields on the tokens they hold in their THR wallets. Holding and staking tokens and liquidity pools allow THR Token holders to accumulate yields on the tokens they hold in their THR wallets.

Own Unlike loyalty points in other platforms, you truly own your THR Tokens, which are stored on an immutable blockchain ledger. Their value is maintained on the open market, and they never expire.

Buy You don't have to wait to earn THR Tokens by making purchases. You can buy THR Tokens on decentralized or centralized exchanges to earn the rewards.

Tokenomics.....

Tiny House Revolution Token Utility - THR Token

Customers will only be able to purchase our Tiny Houses Revolution NFT's with THR Tokens.

These tokens will be the only form of crypto that will be accepted.

Holding/Staking Tokens

THR NFT's can be purchased directly from us at discounted prices - Is the token tied to product usage, i.e. does it give the user exclusive access to it or provide interaction rights to the product?

You can use tokens to book your dream holidays.

You can help people or yourself to create your dream business.

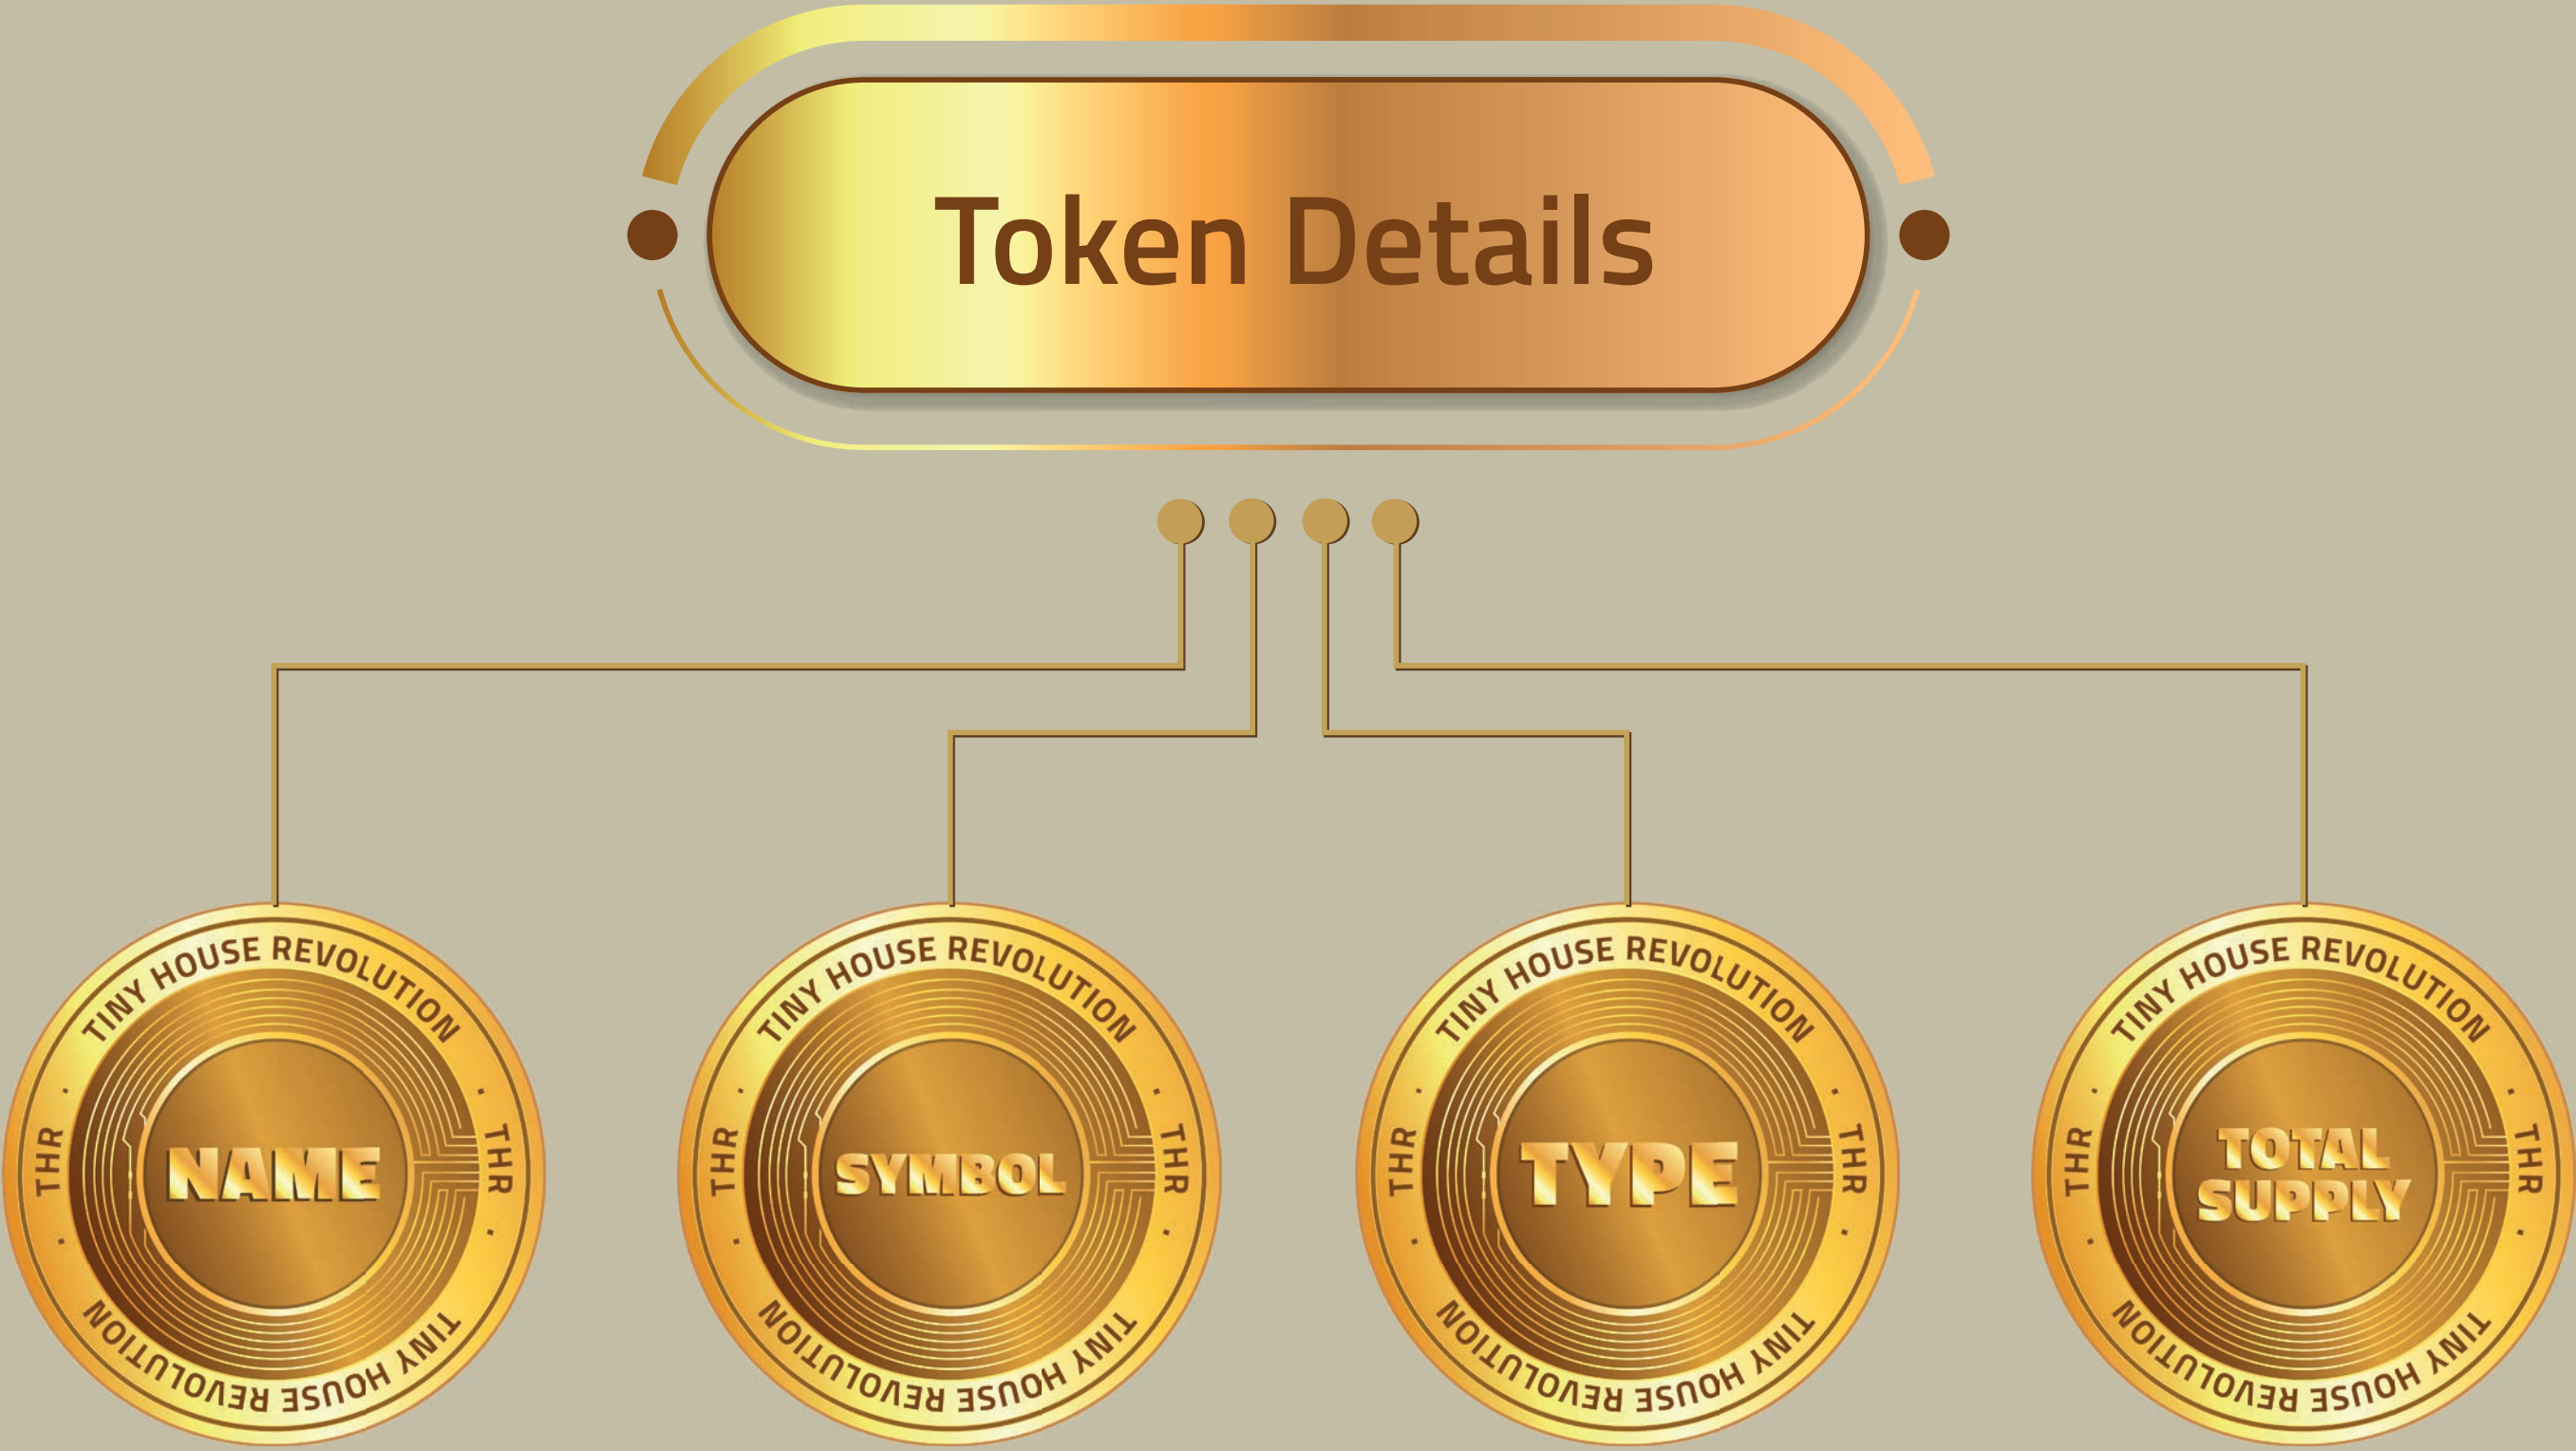

We are planning on hosting a lottery for NFT Holders and THR Token Holders in which they will stand a chance of winning a brand new Tiny House build.

To maintain exclusivity, we will follow a token buy-back policy in which excess tokens will be burnt. Proof-of-Burn will be provided.

By reducing the number of tokens in supply, we make the tokens that remain in circulation rarer, and thus more valuable.

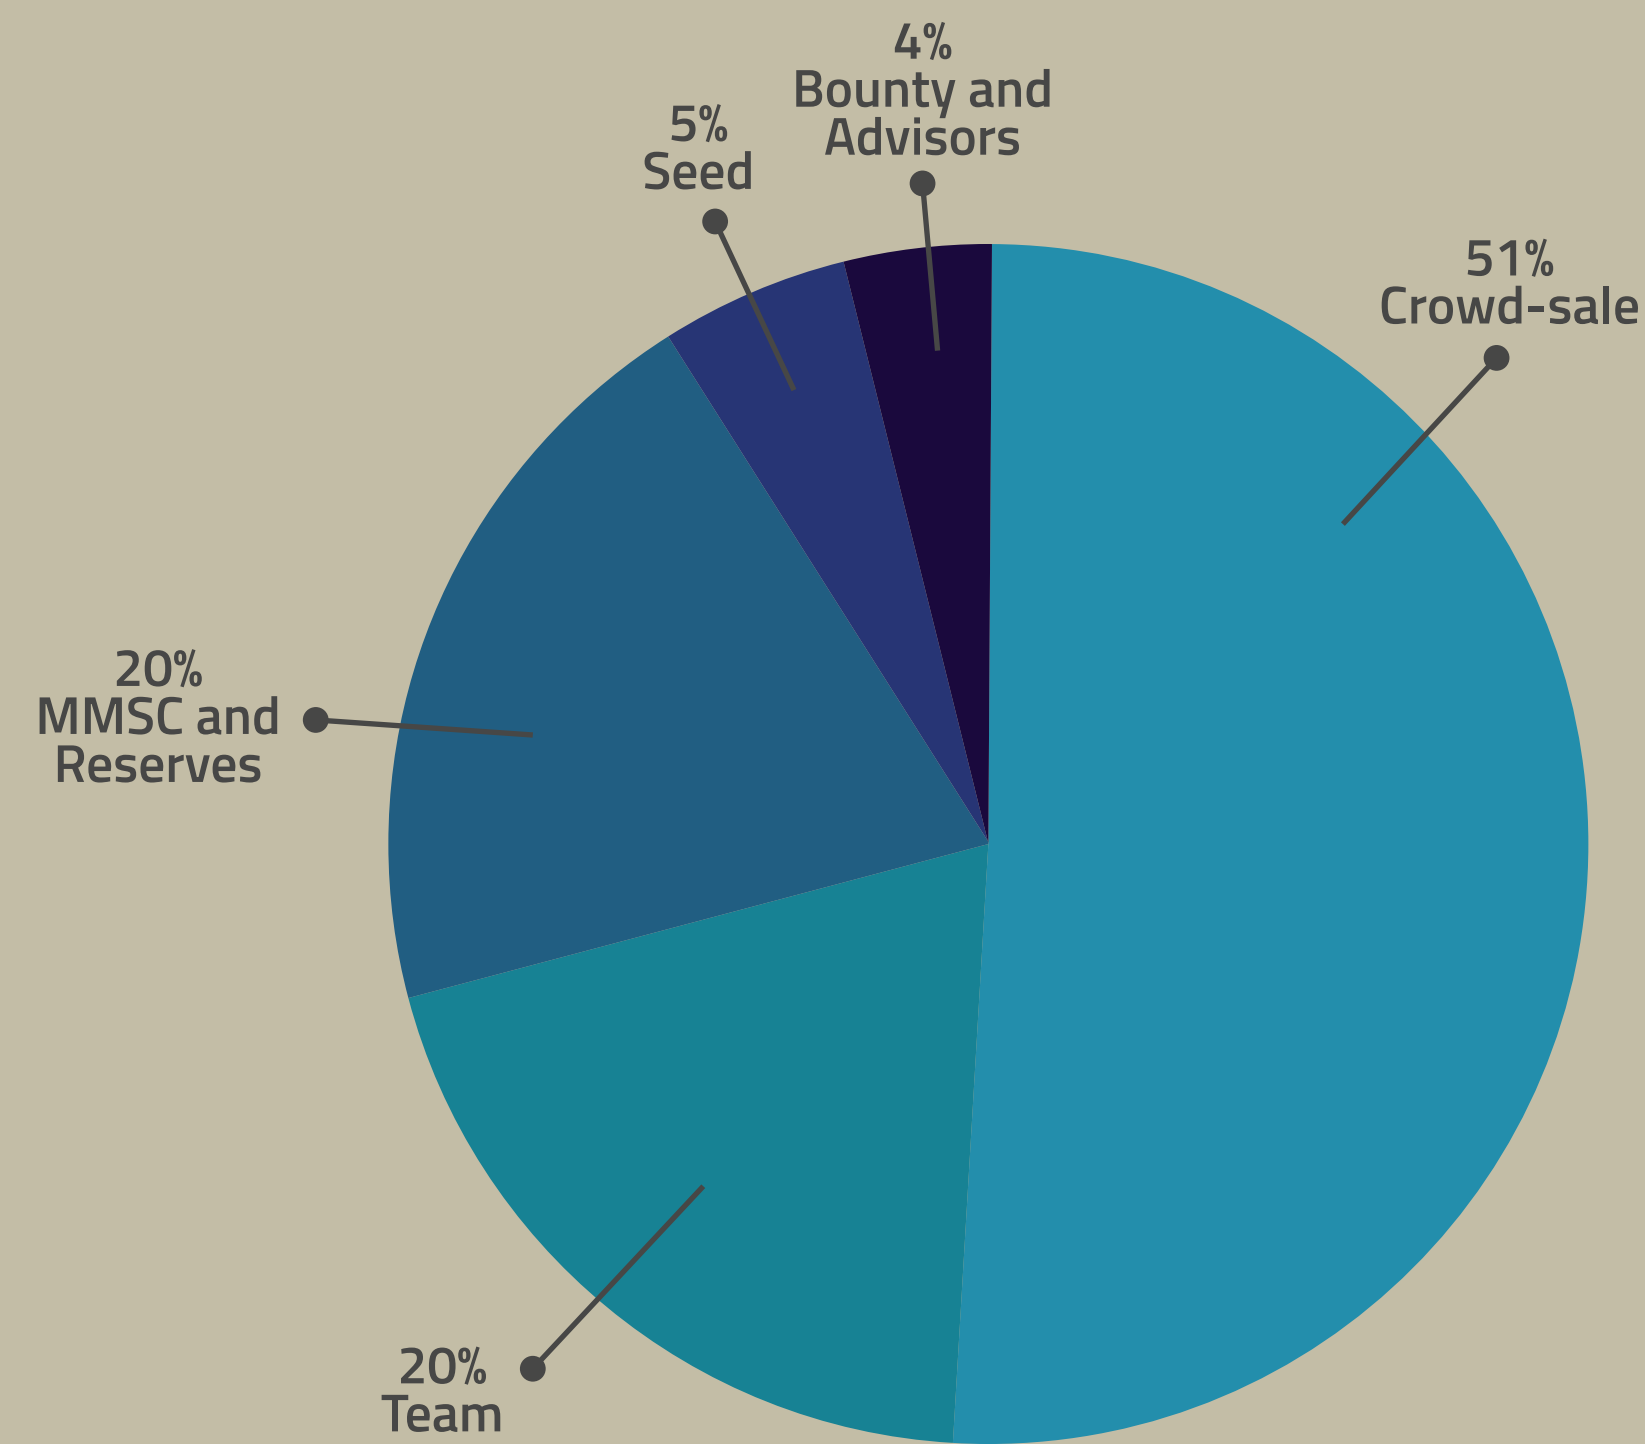

Tokenomics.....

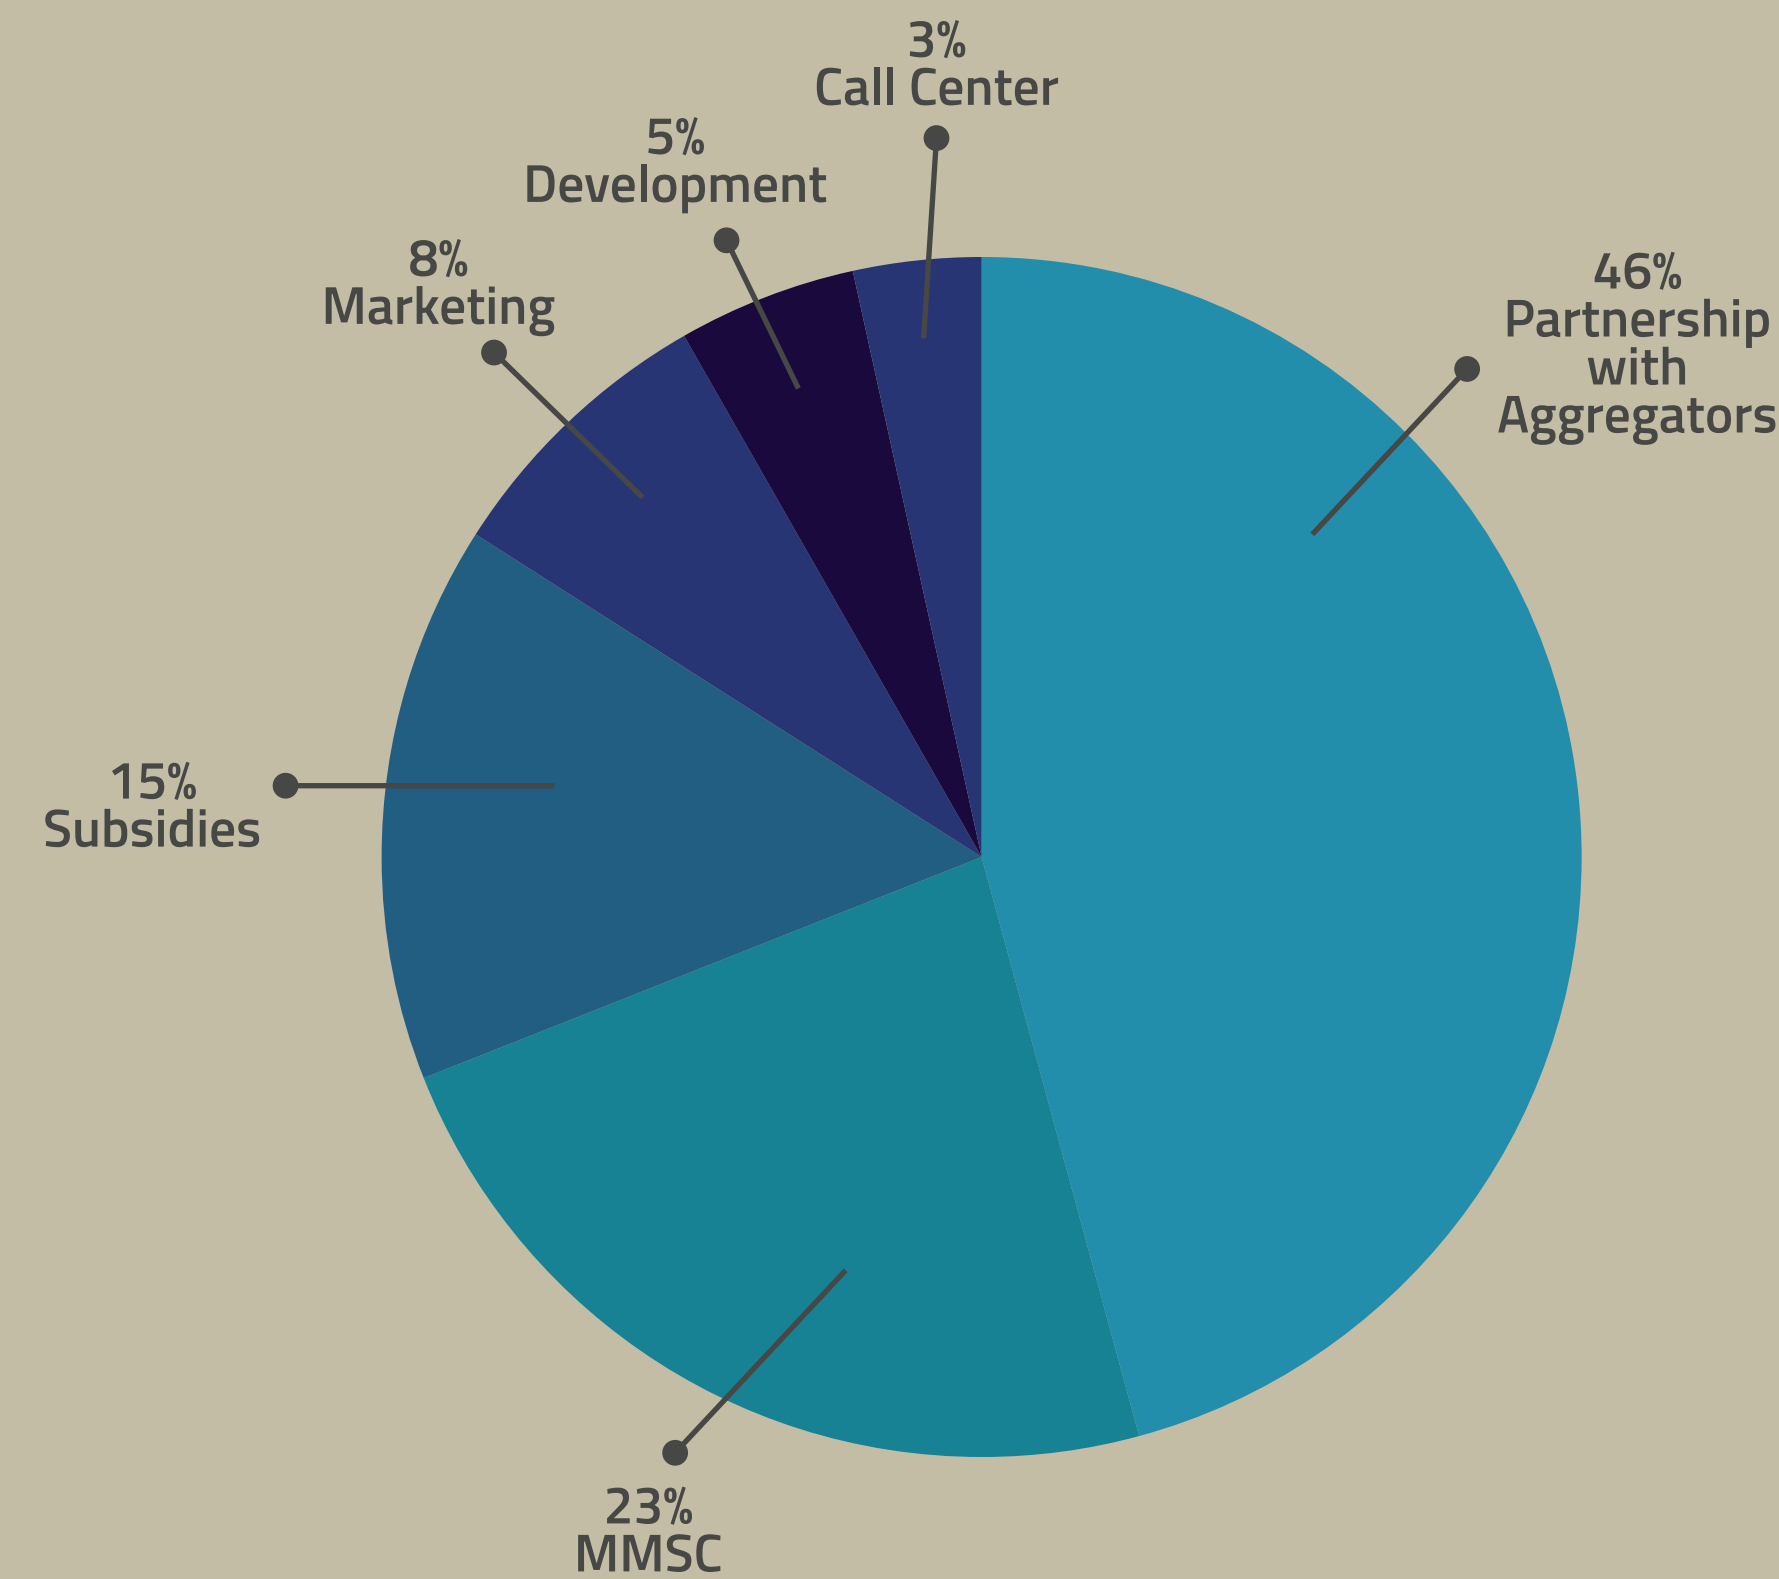

Tokenomics.....

Funds Distributions

Funds Allocation

THR Tiny House - Hospitality Software for Free.....

It is important to note that our Tiny Houses can only be purchased with our THR Token.

You will also have the access to our innovative and exclusive in house hospitality software For Free - designed to aid people in running their rentals as smooth and efficient as possible. Here are some of the functions of our software.

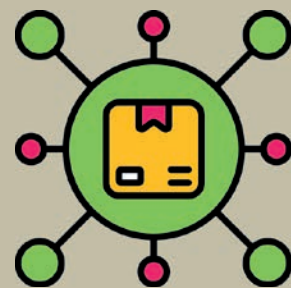

Booking Engine

Inspiring hospitality software to ease communications, automate tasks, and help you get your life back.

Tiny House Manager

A beautifully designed planner and a multi-media library to manage everything on any device.

Channel Manager

Fully automated update of all major travel sites: rates, availability, promos, amenities, extras & policies.

Guest Manager

Drag-and-drop mail designer to automate personalised guest communications. Collect reviews & preferences.

Performance Manager

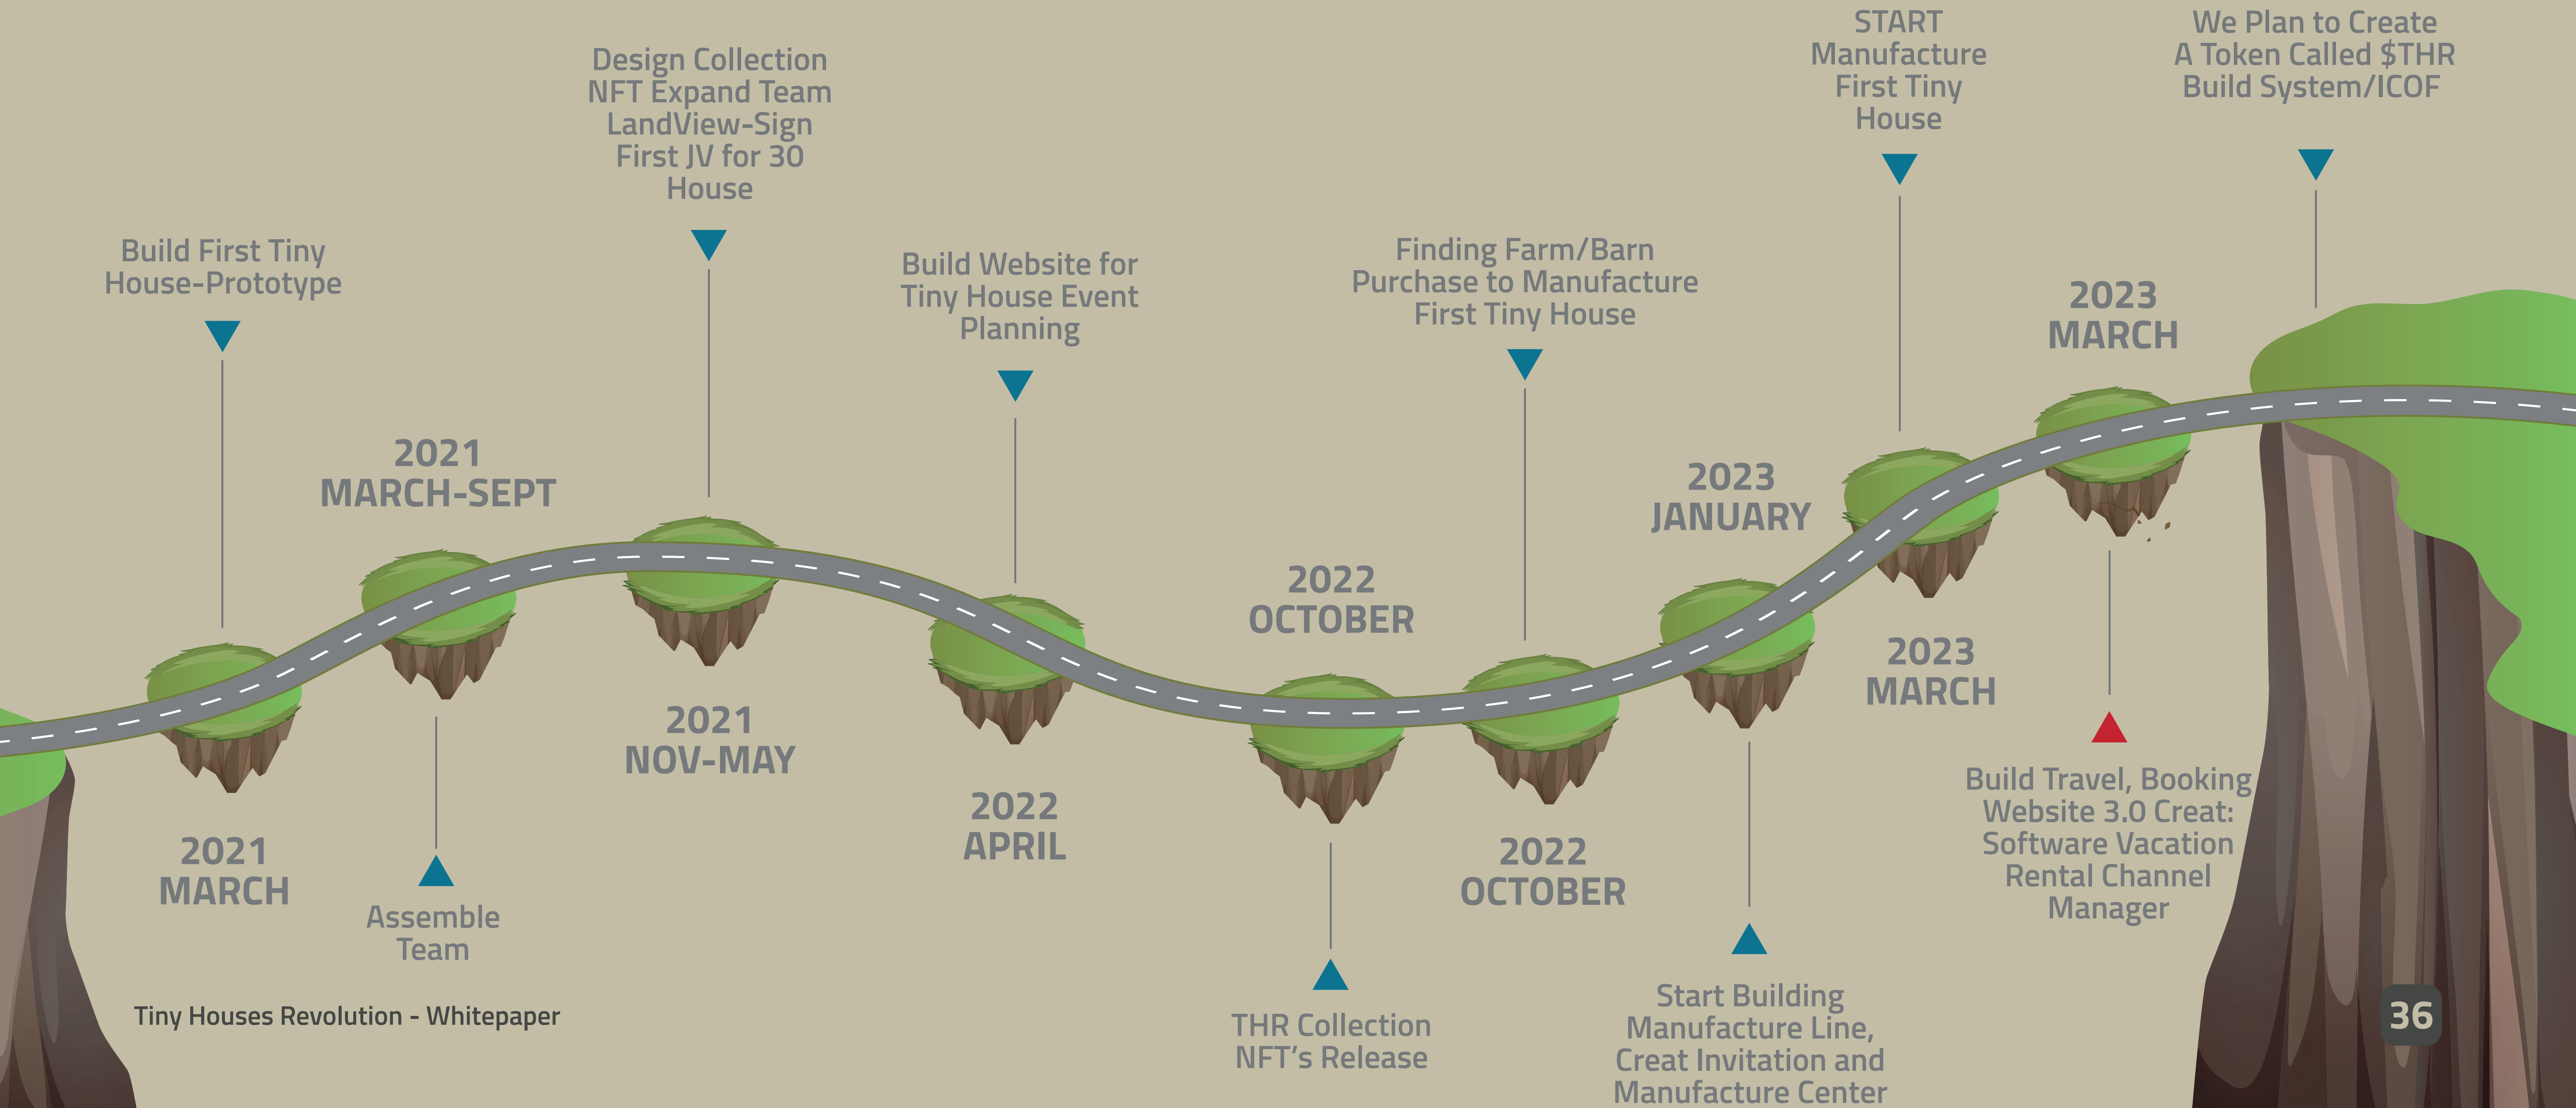

Business insights at your fingertips, easy-to-read graphics, invaluable snapshots and an interactive cleaning dashboard.

Owner Manager

Trust accounting with the automatic consolidation of bookings, charges and booking fees that you need to pass on to owners.

Tiny House Roadmap

Pawel Raczkowski.....

Quote

There are unlimited designs and options when building a tiny house, that is why we have an in-house architect who will assist with the design process.

We don't just supply standard fully built tiny houses, 95% of our custom builds are fully bespoke and are designed by our clients to suit their needs.

Dream it. Draw it. Build it .

Tell us about your custom build tiny house idea

We're here to make your dreams a reality, by sharing with us your inspiration pictures, be it from Pinterest, google or wherever. Upload CAD designs or drawings or simply give us your requirements and we'll get our team of architects to work. We'll give you a call or email to ask for more information, kicking off your free consultation process.

What We Like

- Customers can choose a framed house and complete it themselves
- Off-grid options are available
- New Frontier uses top quality interior and exterior finishes
- Features luxury amenities like a full-sized shower and walk-in closet
- Homes range from 120 to 375 square feet

"With Tiny Houses Revolution, I want to change the direction in which the real estate market rapidly goes towards, which makes us become the nation of renters. Currently, the housing industry is ruled by landlords and bankers. In my experience, they have very little regard to what happens to people who can't afford to buy a £300,000 flat or sustain a £2,000 rental. There are solutions that allow for more people to have the comfort of homeownership and I truly believe that Tiny Houses are one of them."

- Pawel Raczkowski

Tiny Houses Revolution - Whitepaper

Team.....

Pawel Raczkowski
Founder/CEO

Has over of 15 years experience within the property and import and export industry. With a focus on investment property and joint venture investments. He is a innovative thinker with strong financial analysis, digital marketing and advertising acumen.

Architect

I had my master degree in architecture in 2020, and got certified in Residential Interior design in Dubai 2022 by taking a course from experienced Tutors, i have proven experience from working with several projects either as a local architect ans also as a freelancer.

Jaimie Poggenpoel
Social Media Assistant

Jaimie is one of our social media assistants and has a skill set in research, marketing andadministration. Having attended the University of the Western Cape for Psychology and English studies, she has a keen interest in people and literature, alike.

Elif Nur Ülker
Marketing Manager

She has 7 years of marketing experience and has developed and continues to develop herself with various business experiences. Dominates the world of the NFT. She has been involved in marketing in more than one project.

Yasin Kük
Lead Software Engineer

He has 13 years of software experience. He dominates the world of Web3, Metaverse, NFT. 4 years of Blockchain Developer expertise. Additionally, he is a cyber security expert.

Cengiz Ergüleç
Designer/Illustrator

He is an illustrator with 8 years of experience, whose passion is creating. Got graduated from Fine Arts and Graphic departmant. Recently started creating arts for NFTs beside graphic works.

Conclusion.....

In a world where we are constantly being bombarded with new ways to spend our money, it is refreshing to know that there are still ways to save. The tiny house revolution is one of those ways. Not only will you be saving money on your mortgage or rent, but you will also be doing your part to help the environment. So if you are looking for a way to save money and help the environment, the tiny house revolution is the way to go!

A tiny house differs from other houses in size, obviously. A typical small home might include 1,000 square feet or less; however, each person has their own unique preference when it comes to how much space they need. Some people might prefer just 100 square feet while others want 1,800 square feet – either way a tiny home is much smaller than most standard homes out there today. You can even find ones out there that have as many as 3 bedrooms and 2 bathrooms; however these types are typically more costly than their smaller counterparts but they do come with more amenities such as kitchens and living rooms; some even have decks and backyard areas which make them even more like traditional homes than others out there today.
